## Add Your Event

Add your event

[www.aberdeencity.gov.uk/events](http://www.aberdeencity.gov.uk/events)

[www.facebook.com/events](http://www.facebook.com/events)

# Core Functionality

Initialising FB Events API and  
Google Maps API

Pull data from Google spreadsheet

Get for each location most recent events

Set Google Maps marker on map and  
store details in a nested array

Add listener for each marker, that will open an info  
box, which contains the venue and events data

## Facebook Events Scraper
